

# How do I do an Instant Record?

*Note: Instant Recording is a quick way to record the channel you are currently viewing.*

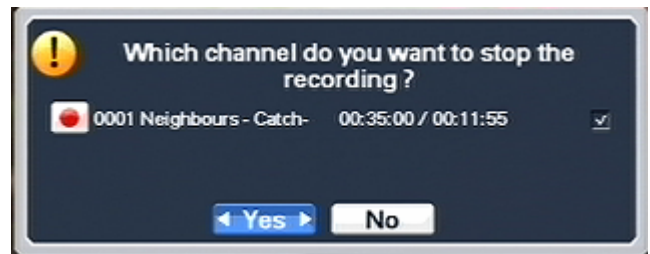

1. Switch on the Homecast PVR and wait for a picture to show on the screen. If a picture doesn't appear, your PVR may need to scan your channels first – See "How do I do a Channel Scan?"
2. Change to the channel you wish to record and press the REC button on the remote

3. Use the ◀▶ ARROW buttons on the remote to increase / decrease the Duration

4. To Pause or Resume a recording, press the PAUSE button on the remote, then press the PAUSE button to Pause / Resume
5. To STOP the recording, press the STOP button, then use the ▲▼ ARROW buttons to highlight the recording you want to stop and press OK to check the tick box. Then use the ARROW buttons to highlight Yes & press OK

*Note: if you have used the REW button to move back through the recording, pressing Stop will return you to the Live position.*

You can also use the REW, FF and SLOW buttons to move back through the recording (like time shifting)

FOR MORE DETAILED INFORMATION REFER TO CHAPTER 9.3 IN THE MANUAL
